

Applied Riskhandler

Your cloud-based solution for personal lines, commercial lines, and niche product distribution services.

Riskhandler is a highly scalable SaaS platform for MGAs, insurers, and product providers, enabling rapid insurance product innovation and underwriting controls for full-cycle rating, bind, referral, document generation and full-cycle policy management.

As a cloud-based solution for insurers and other product providers that need agile, low-code product creation and distribution, with direct control of their insurance products, Riskhandler enables low-cost and low-risk product build and implementation, helping you to secure and retain profitable business.

What Applied Riskhandler Offers Your Business

- A cloud-based solution improves uptime, enhances security, and simplifies integration with other systems
- A real-time rating, risk acceptance, documentation, and endorsement library that incorporates broker configuration
- An efficient and powerful referral solution for onboarding non-standard business
- An insurer underwriting policy administration, accounting and claims platform combined with an off-the-shelf cloud portal for product distribution via brokers
- Easier product change control that guarantees insureds receive the most up-to-date products, helping you attract and retain customers
- Direct, self-service control of pricing and risk selection
- SaaS model, built on Microsoft technology stack and hosted on Microsoft Azure
- Zero client-side deployment

Allows your business to

- Build and distribute new products with agility
- Control price and risk acceptance in real-time
- Enforce delegated authority rules and evidence of process
- Implement a cloud-based solution for product delivery via broker channels (extranet and broker system integration)
